Lital Rotter

Mechanical Engineer
litalyael980@gmail.com | 050-9278884 | linkedin.com/in/lital-rotter

PROFESSIONAL SUMMARY

Mechanical Engineer, B.Sc., Summa Cum Laude, with experience in cooling and pumping systems, energy efficiency, mechanical design and product engineering, including work with international manufacturers. Strong academic foundation in heat transfer, fluid mechanics and thermodynamics.

PROFESSIONAL EXPERIENCE

Energy Domain Manager & R&D Engineer, ESE — June 2025 – Present

- Assess energy efficiency of industrial cooling and pumping systems, with on-site temperature, pressure and flow measurements.
- Analyze system performance, identify optimization opportunities, and prepare engineering reports and recommendations for management.
- Evaluate and pilot new energy technologies in R&D projects, including collaboration with startups.
- Define technical specifications and work with Unitronics control, monitoring and data-acquisition systems, including programming.

Product Engineer, Krausz Industries — September 2024 – June 2025

- Owned packaging and fastener products: packaging design, catalog management and supplier issue resolution.
- Supported the transition of products from development to production.
- Modeled products in SolidWorks, prepared manufacturing documentation and implemented engineering changes.
- Worked with international manufacturers using Priority ERP, PDM and VxElement.

Student, Engineering Team, SolarEdge — 2022 – September 2024

- Performed strength testing, including shear, tensile and packaging drop tests, to standards.
- Updated engineering drawings in SolidWorks.
- Resolved field quality issues with customers and international manufacturers.

ACADEMIC FINAL YEAR PROJECT

Thermal & Mechanical Design of a PV Panel Hot-Spot Monitoring System — SolarEdge and Ariel University

- Designed mechanical components and the sealed electronics enclosure in SolidWorks.
- Designed a heat sink and custom cooling fins for the Raspberry Pi to improve heat dissipation.
- Integrated thermal and mechanical requirements, including temperature and environmental limits.

EDUCATION

B.Sc. Mechanical Engineering and Mechatronics, Ariel University — 2020 – 2024

- Summa Cum Laude. Rector's Certificate of Merit for academic excellence, 2021–2023.
- Certified Energy Supervisor.
- Relevant coursework: Heat Transfer, Fluid Mechanics, Thermodynamics, Numerical Methods.

TECHNICAL SKILLS

- Thermal, Energy & Engineering: Cooling Systems, Pumping Systems, Energy Efficiency.
- Mechanical Design & CAD: SolidWorks, SolidWorks Sheet Metal, Fusion 360, Mechanical Product Design, 3D Scanning, VxElement.
- Simulation & Programming: MATLAB, with Ansys Fluent and Python at beginner level.
- Systems & Tools: Unitronics, Priority ERP, PDM.

TRAINING

- Plastic Injection Planning, Bergo Lab.
- SolidWorks for Students, Engineers and Designers, Udemy.
- SolidWorks Sheet Metal, Systematics.

MILITARY SERVICE

- 2016–2017: Observer, 636th Battalion, Jerusalem Envelope.
- 2017–2018: Laboratory Technician, Clinic 8284, Ofarit Jerusalem.
