Lital Rotter

Mechanical Engineer

litalyael980@gmail.com | 050-9278884 |LinkedIn

Objective:

Mechanical Engineer specializing in thermal and energy systems, with hands-on experience in energy efficiency analysis, cooling and pumping systems mechanical product design and applied R&D. Experienced in mechanical design, plastic injection planning, and proficient in SolidWorks for product modeling and development. Skilled in Sheet Metal design and working with 3D scanners.

Education:

2020-2024: B.Sc. Mechanical Engineering and Mechatronics, Ariel University.

Summa Cum Laude.

Certificate of Merit Rector of Ariel University 2021,2022, 2023. Certified Energy Supervisor.

- Courses:
  - Plastic Injection Planning, Bergo Lab.
  - SolidWorks: For Students, Engineers, And Designer, Udemy.
  - SolidWorks Sheet Metal course, Systematics.
  - Heat Transfer, Ariel University
  - Fluid Mechanics, Ariel University
  - Thermodynamics, Ariel University
- Academic Project – Thermal & Mechanical Design of of PV Panels
  SolarEdge | B.Sc. Mechanical Engineering & Mechatronics

  - Designed the mechanical components and enclosure using SOLIDWORKS.
  - Performed the thermal design of a heat sink for the Raspberry Pi used in the system.
  - Integrated the mechanical and thermal requirements into the overall product design.

Experience:

June 2025-Present: Energy Domain Manager & R&D Engineer, ESE.

- Lead energy efficiency testing of cooling and pumping systems, analyze performance data, and deliver technical reports with optimization recommendations.

- Perform theoretical and applied research using SolidWorks and collaborate with startups on the evaluation and piloting of new energy technologies.
- Define technical specifications and implementation guidelines. Manage workflows using Monday and work with Unitronics systems for control, monitoring, and data acquisition.

Sep 2024-June 2025: Product Engineer, Krausz Industries.

- Oversaw packaging and fasteners within the company. Transferred products from development to production
- Responsible for product modeling, preparing production files, and implementing engineering changes.
- Worked with ERP (Priority) and PDM systems. Utilized Vxelement software.

2022- Sep 2024: Mechanical Student Position, SolarEdge

- Experienced in testing hardness and strength of materials and proficient in CAD software like SOLIDWORKS for product design.
- Maintained and coordinated work with international manufacturers.

Technical skills:

- Programming: Python, MATLAB.
- Tools: Visual Studio, Monday, Office 365, Fusion, SolidWorks.

Military Service:

- 2016-2017: An observer in the 636th battalion, Envelope Jerusalem.
- 2017-2018: Lab technician in Jerusalem clinic 8284, Ofarit Jerusalem.
